

OLEG AGNAEV

CIO/Chief Information officer

ABOUT ME

I have progressed from a software developer to an IT Director, which enables me to understand IT at all levels — from code to strategic management.

I have completed additional education in management, allowing me to align IT solutions with real business objectives.

I possess successful experience in building and managing development teams, implementing IT systems, and driving digital transformation. An internship in Japan provided hands-on experience in applying lean manufacturing methods and process optimization.

I effectively utilize modern project management methodologies (Agile, Scrum, Kanban) and know how to implement KPIs and metrics that improve transparency and performance.

Key Competencies:

- Strategic and operational IT management
- IT infrastructure and system architecture design
- Business process digitalization and automation
- IT and business integration, cost optimization;
